CONTENTS OF VOLUME 55

NUMBER 1, JANUARY, 1970

1 Bruce S. Jacobson, Bruce N. Smith, Samuel Epstein, and George G. Laties. The prevalence of carbon-13 in respiratory carbon dioxide as an indicator of the type of endogenous substrate. The change from lipid to carbohydrate during the respiratory rise in potato slices

18 G. D. V. van Rossum. Net movements of calcium and magnesium in slices of rat liver

33 Francisco Ruiz-Manresa, Adolfo C. Ruarte, Tobias L. Schwartz, and Harry Grundfest. Potassium inactivation and impedance changes during spike electrogenesis in eel electroplaques

48 H. Kuriyama, T. Osa, and H. Tasaki. Electrophysiological studies of the antrum muscle fibers of the guinea pig stomach

63 R. DiPolo, R. I. Sha'afi, and A. K. Solomon. Transport parameters in a porous cellulose acetate membrane

77 Saul Winegrad. The intracellular site of calcium activation of contraction in frog skeletal muscle

89 Roger F. Palmer and Virginia A. Posey. Calcium and adenosine triphosphate binding to renal membranes

104 Rita Guttman and Robert Barnhill. Oscillation and repetitive firing in squid axons. Comparison of experiments with computations

119 Gerald Ehrenstein, Harold Lecar, and Ralph Nossal. The nature of the negative resistance in bimolecular lipid membranes containing excitability-inducing material

137 Abstracts of Papers Presented at the Twenty-Third Annual Meeting of the Society of General Physiologists

NUMBER 2, FEBRUARY, 1970

147 H. Kuriyama and T. Tomita. The action potential in the smooth muscle of the guinea pig taenia coli and ureter studied by the double sucrose-gap method

163 André B. Borle. Kinetic analyses of calcium movements in cell cultures. III. Effects of calcium and parathyroid hormone in kidney cells

187 Margaret Ginzburg, Laura Sachs, and B. Z. Ginzburg. Ion metabolism in a *Halobacterium*. I. Influence of age of culture on intracellular concentrations

208 W. O. Kwant and Philip Seeman. The erythrocyte ghost is a perfect osmometer

220 William R. Galey and J. T. Van Bruggen. The coupling of solute fluxes in membranes

243 B. A. Curtis. Calcium efflux from frog twitch muscle fibers
254 A. M. Gordon and R. E. Godt. Some effects of hypertonic solutions on contraction and excitation-contraction coupling in frog skeletal muscles

NUMBER 3, MARCH, 1970

277 Jean Jacques Hajjar, Anne S. Lamont, and Peter F. Curran. The sodium-alanine interaction in rabbit ileum. Effect of sodium on alanine fluxes
297 Peter F. Curran, Jean Jacques Hajjar, and I. M. Glynn. The sodium-alanine interaction in rabbit ileum. Effect of alanine on sodium fluxes
309 Leon Andres Cuervo and William J. Adelman, Jr. Equilibrium and kinetic properties of the interaction between tetrodotoxin and the excitable membrane of the squid giant axon
336 Francisco G. Varela and Wayne Wiitanen. The optics of the compound eye of the honeybee (*Apis mellifera*)
359 John Gutknecht and D. C. Tosteson. Ionic permeability of thin lipid membranes. Effects of *n*-alkyl alcohols, polyvalent cations, and a secondary amine
375 Vincent W. Dennis, Nancy W. Stead, and Thomas E. Andreoli. Molecular aspects of polyene- and sterol-dependent pore formation in thin lipid membranes
401 P. Horowicz, J. W. Taylor, and D. M. Waggoner. Fractionation of sodium efflux in frog sartorius muscles by strophanthidin and removal of external sodium

NUMBER 4, APRIL, 1970

427 R. I. Sha'afi, G. T. Rich, D. C. Mikulecky, and A. K. Solomon. Determination of urea permeability in red cells by minimum method. A test of the phenomenological equations
451 F. L. Vieira, R. I. Sha'afi, and A. K. Solomon. The state of water in human and dog red cell membranes
467 Roger Eckert and Yutaka Naitoh. Passive electrical properties of *Paramecium* and problems of ciliary coordination
484 H. Levitan, L. Tauc, and J. P. Segundo. Electrical transmission among neurons in the buccal ganglion of a mollusc, *Navanax inermis*
497 A. Mauro, F. Conti, F. Dodge, and R. Schor. Subthreshold behavior and phenomenological impedance of the squid giant axon
524 W. H. Freygang and W. Trautwein. The structural implications of the linear electrical properties of cardiac Purkinje strands
548 Raimundo Villegas, Flor V. Barnola, and Germán Camejo. Ionic channels and nerve membrane lipids. Cholesterol-tetrodotoxin interaction

NUMBER 5, MAY, 1970

563 The Jacques Loeb Memorial Lecture

Detlev W. Bronk. Introductory remarks
Theodore Holmes Bullock. The reliability of neurons

585 D. J. HARTSHORNE. Interactions of desensitized actomyosin with tropomyosin, troponin A, troponin B, and polyanions

602 S. BOSTEELS, A. VLEUGELS, and E. CARMELIET. Choline permeability in cardiac muscle cells of the cat

620 C. Y. KAO and P. R. STANFIELD. Actions of some cations on the electrical properties and mechanical threshold of frog sartorius muscle fibers

640 DANTE J. CHIARANDINI, JOHN P. REUBEN, PHILIP W. BRANDT, and HARRY GRUNDFEST. Effects of caffeine on crayfish muscle fibers. I. Activation of contraction and induction of Ca spike electrogenesis

665 DANTE J. CHIARANDINI, JOHN P. REUBEN, LUCIEN GIRARDIER, GEORGE M. KATZ, and HARRY GRUNDFEST. Effects of caffeine on crayfish muscle fibers. II. Refractoriness and factors influencing recovery (repriming) of contractile responses

688 ALAN JOHNSON and HOWARD ROTHSTEIN. Amphibian lens histones and their relation to the cell cycle

NUMBER 6, JUNE, 1970

703 L. L. COSTANTIN. The role of sodium current in the radial spread of contraction in frog muscle fibers

716 C. A. ROTUNNO, F. A. VILALLONGA, M. FERNÁNDEZ, and M. CEREIJIDO. The penetration of sodium into the epithelium of the frog skin

736 R. S. EISENBERG and E. ENGEL. The spatial variation of membrane potential near a small source of current in a spherical cell

758 CAROLYN W. SLAYMAN and CLIFFORD L. SLAYMAN. Potassium transport in *Neurospora*. Evidence for a multisite carrier at high pH

787 JOHN NOLTE and JOEL E. BROWN. The spectral sensitivities of single receptor cells in the lateral, median, and ventral eyes of normal and white-eyed *Limulus*

802 H. D. W. SADDLER. The membrane potential of *Acetabularia mediterranea*

822 LETTERS TO THE EDITOR

DANIEL L. GILBERT and GERALD EHRENSTEIN. Use of a fixed charge model to determine the pK of the negative sites on the external membrane surface

826 INDEX TO VOLUME 55
